

## NORTHERN ARIZONA & SOUTHWESTERN UTAH

'September is a wonderful month to travel to Northern Arizona and Southwestern Utah – although it is still hot in the desert, the temperatures in the mountains and canyons at higher elevations are quite comfortable, and the crowds are somewhat reduced. Our tour was a whirlwind trip through some of the most amazingly scenic country in the United States (or anywhere for that matter), and combined with a healthy bird list of some 200 species, this year's trip was another great success!

We begin the trip in Phoenix and visit the Boyce Thompson Arboretum on our way from the desert heat to the cool mountain environments. At the Arboretum we saw a variety of lowland desert specialties, as well as a scattering of migrants. Some of the nice birds we saw included White-winged Dove, Broad-billed and Anna's Hummingbirds, Gila Woodpecker, Ash-throated Flycatcher, Bell's Vireo, Canyon Wren, Black-tailed Gnatcatcher, Black-throated Sparrow, and Abert's Towhee. A brief drive-by of Roosevelt Lake produced hundreds of Western Grebes, and a stop in the cooler pine forest on the way to Flagstaff produced Western Bluebirds, Pygmy Nuthatches, Plumbeous Vireo and Grace's Warbler, not to mention the hundreds of Elk at Mormon Lake.

We next continued north crossing the mighty Colorado River at Marble Canyon, and on to the Vermillion Cliffs, where we again saw a number of the released California Condors! Even though the release program is in its infant years, it is still fun and impressive seeing real California Condors circling over the stunning red cliffs! It was then on to the Grand Canyon. Words can not describe the vastness and beauty of the Grand Canyon – one MUST see it with their own eyes. We spent the afternoon and following morning visiting the various viewpoints accessible from the North Rim – in my opinion, the more interesting "Rim" to see the canyon from. Although the canyon dominated our attentions, we still managed to see some fun birds, including Wild Turkey, Zone-tailed and Swainson's Hawks, White-throated Swift, Clark's Nutcracker, Black-throated Gray Warbler, and Green-tailed Towhee. Perhaps one of the favorite birds of the trip was the Greater Roadrunner we saw on the way to the canyon! A Kaibab Squirrel with its glorious white tail was also a big highlight!

Southwest Utah is stunningly beautiful – there's just no two ways about it! We visited Zion National Park both in the late afternoon and early morning, allowing us the best of both different lighting conditions in the canyon. A walk along the Virgin River to the "Narrows" produced incredible views of the several hundred foot high cliffs, as well as two American Dippers feeding in the stream. Another highlight was the close views of a group of Bighorn Sheep. We saw our only Black-capped Chickadees and Downy Woodpecker of the trip in Zion. Bryce Canyon was another type of scenic beauty, totally different from Zion, but incredible nonetheless. We spent a wonderful morning visiting the several vantage points along the rim of the canyon, and although, again, the scenery dominated our morning, we did see a close Dusky Grouse along the road, and some saw a stunning male Williamson's Sapsucker. Our main birding was conducted outside of the parks themselves – some of the more interesting birds we saw during our stay in Utah included a wide variety of ducks, Eared and Western Grebes, American White Pelican, Golden Eagle, Black-chinned and Rufous Hummingbirds, Black-billed Magpie, Pinyon Jay, Mountain Bluebird, Virginia's Warbler, Vesper Sparrow, and Yellow-headed Blackbird.

We next traveled through Navajo Country and extreme northeastern Arizona, visiting several scenic areas and nice birding locations. We began with a visit to Antelope Canyon at Page. This is a "Slot" canyon that is just stunning and difficult to describe – no birds to speak of, but it is always one of the true highlights of the trip! We also visited Monument Valley, which conjured up images of old "Western" movies (or car commercials?), and hour drive through

## N. ARIZONA AND UTAH: Bird List...2

tour of the valley was another scenic treat. Canyon de Chelly was one of our “favourite” canyons of the trip, and as usual, was totally unexpected in terms of its beauty and vastness. A drive through of Petrified Forest and the Painted Desert finished off our visit to northern Arizona. Although these locations were again incredible scenic highlights, we actually did spend most of our time looking for birds in between our devouring of “eye-candy.” We visited several lakes and ponds, and scattered groves of trees that form oases for migrants. The weather was a little “too good” for major fallouts of migrants, yet we saw a wide variety of both waterbirds and passerines that made our visit to this remote region more than worthwhile. Some of the highlights from this portion of the trip included Greater White-fronted Goose, Clark’s Grebe, White-faced Ibis, Prairie Falcon, Baird’s Sandpiper, Red-necked and Wilson’s Phalaropes, *four* different Sabine’s Gulls, Common Tern, Willow Flycatcher, Black and Say’s Phoebes, Juniper Titmouse, more Pinyon Jays, MacGillivray’s and Wilson’s Warblers, Spotted Towhee, and lots of Brewer’s Sparrows.

We finished the trip with a three-night stay in the beautiful White Mountains of eastern Arizona near the town of Springerville. The birding in this region is fun and the areas are quite beautiful. We had a few nice walks along the riparian habitat along the Little Colorado River, spent time in the high-elevation coniferous forests, and visited a number of high-elevation lakes covered in ducks. Some of the better birds we encountered included Common Merganser, an adult (and immature) Bald Eagle, Northern Harrier, a nice male Broad-tailed Hummingbird, Olive-sided Flycatcher, Western Scrub Jay, Mountain Chickadee, Bushtit, Red-breasted Nuthatch, Rock Wren, Townsend’s Solitaire, Green-tailed and Spotted Towhees, and both Eastern and Western Meadowlarks. Every stop produced a scattering of migrants. On the way back to Phoenix, where the trip ended, we spent the day spot-checking a number of different habitats as we dropped off the Mogollon Rim and ventured back into southern Arizona. We did very well adding a number of interesting birds, including Acorn and Hairy Woodpeckers, Gray, Cassin’s and Hutton’s Vireos, Mexican Jay, Bridled Titmouse, Painted Redstart, Hepatic Tanager, black-chinned Sparrow, and Scott’s Oriole. We ended at some ponds in Gilbert where we saw lots of Black-necked Stilts, a scattering of other shorebirds, such as Long-billed Dowitchers, and a few new passerines such as Northern Mockingbird and Song Sparrow.

In all, the trip was a great success – we put on about 2300 miles across some unbelievable country where we saw some of the most-scenic canyons and National Parks in the United States. Added to that we saw nearly 200 species of birds, including many of the Rocky Mountain specialties.’ – Gary Rosenberg.

### Bird List:

Column A = Number of tours on which this species has been recorded.

Column B = Number of days this species was seen on the last tour.

Column C = Maximum daily count for this species on the tour.

H = Heard

A	B	C	
1			<i>Dendrocygna autumnalis</i>
3	1	1	<i>Anser albifrons</i>
7	6	100	<i>Branta canadensis</i>
7	3	25	<i>Anas strepera</i>
7	3	50	<i>Anas americana</i>
7	8	‘00s	<i>Anas platyrhynchos</i>

### N. ARIZONA AND UTAH: Bird List...3

5 Blue-winged Teal	2	8	<i>Anas discors</i>
7 Cinnamon Teal	8	30	<i>Anas cyanoptera</i>
7 Northern Shoveler	7	30	<i>Anas clypeata</i>
7 Northern Pintail	4	20	<i>Anas acuta</i>
7 Green-winged Teal	4	'00s	<i>Anas crecca</i>
7 Redhead	2	25	<i>Aythya americana</i>
7 Ring-necked Duck	2	10	<i>Aythya collaris</i>
2 Lesser Scaup			<i>Aythya affinis</i>
